Let's Build the Future of Events

A unified digital platform built to replace event chaos with smart automation giving you complete real-time control and delivering immediate satisfaction to your guests.

* **Idexi Pass** **Smart Digital Ticketing**

Concept: Replaces traditional methods with fully branded, personalized digital tickets containing unique QR codes.

Key Features: Seamless Excel import, automated bulk emailing to thousands in under 5 minutes, and premium sponsor branding.

* **Idexi Flow** **The Unified Operations Hub**

Concept: A centralized control system that empowers event staff to manage every touchpoint using their personal smartphones.

Key Features: Multi-purpose scanning (Check-in, Meals, Welcome Kits, Workshops), instant guest status retrieval, and comprehensive reporting.

* **Idexi Face** **Your Event Photos, Delivered Instantly**

Concept: A game-changing system that solves the event media headache by using smart facial recognition to automatically organize photos into private digital galleries for every guest.

Key Features: Secure delivery via a private link tied to the attendee's registered email to guarantee privacy. Guests can easily view and download their moments from fully branded emails showcasing event and sponsor logos—maximizing brand exposure, delivering a premium "Wow" factor, and ensuring immediate attendee satisfaction.

Idexi Face

| Your Event Photos, Delivered Instantly

The Core Concept:

It's simple: Attendees should not have to search through thousands of event folders to find themselves. Idexi Face automatically finds every guest's photos and sends them directly to their phone.

How It Works (In 3 Simple Steps):

1. The Selfie: Guests register by taking a quick selfie and providing their email.
2. The Sorting: Event photographers upload all the raw photos to our system. Our smart software instantly scans the pictures and matches faces.
3. The Delivery: Guests receive an email with a link to their own personal photo gallery. No searching needed.

Smart, Secure, and Sponsor Friendly

* Smart Tracking:

The system is designed for the reality of crowded events. Whether a guest is in a massive group photo of 200 people, standing on the side, or even wearing sunglasses, the system will find their face and add the photo to their personal gallery.

* 100% Private:

We do not use public photo links. To guarantee privacy, guests must enter a verification code (OTP) sent to their registered email to unlock their gallery. They see their photos, and only their photos.

* Premium Sponsor Visibility:

The delivery emails and the digital galleries are fully customized with your event's branding and sponsor logos. This turns a simple photo delivery into a powerful marketing tool that everyone will see.

Idexi Pass

| Smart Digital Ticketing

The Core Concept:

Say goodbye to manual ticket approvals and generic emails. Idexi Pass is a high-speed automation tool that sends beautifully branded, personalized digital QR tickets directly to your guests in minutes.

How It Works (In 3 Simple Steps):

- 1. The Guest List:** You simply upload an Excel sheet with your attendees' details (Name, Category, etc.), or have them register directly through our platform.
- 2. The Automation:** With one click, the system generates thousands of unique QR codes.
- 3. The Delivery:** In under 5 minutes, every guest receives a professional email ticket containing their name, specific category, and their personal QR code.

Smart, Secure, and Sponsor Friendly

* Premium Brand Visibility:

Your tickets shouldn't look boring. Every email ticket is fully customizable, allowing you to prominently display your event's logo and give your sponsors premium visibility right on the ticket.

Idexi Flow

| The Unified Operations Hub

The Core Concept:

You don't need expensive scanning hardware or messy printed lists. We turn your staff's personal smartphones into powerful tracking tools. With just one universal QR code per guest, you control every touchpoint of your event.

How It Works (Dynamic Scanning):

You can give secure dashboard access to any number of organizers or volunteers. They simply use their phones to scan a guest's QR ticket for different purposes:

- Access Control: Instantly verify entry times and highlight VIP guests.
- Logistics & Hospitality: Track exactly who received their welcome kit, badge, or lunch meal to perfectly manage your inventory.
- Workshops & Sessions: Verify which specific workshop a guest registered for and guide them to their assigned seat number.

Smart, Secure, and Sponsor Friendly

* Comprehensive Reporting:

By the end of the event, the system generates a full, data-rich report showing the exact journey and actions of every single attendee.

Why Choose Us?

Because your event deserves more than just basic management. It deserves a complete digital transformation.

* An All-in-One Ecosystem

Stop juggling multiple platforms, printed lists, and fragmented data. Idexi provides a single, unified system that seamlessly connects your ticketing, crowd operations, and media delivery under one smart roof.

* Maximum Sponsor ROI

Every touchpoint is an opportunity. From the first email ticket to the final photo gallery, we turn standard event communications into premium, highly-viewed advertising spaces for your brand and your sponsors.

* The Ultimate "Wow" Factor

We go beyond basic logistics. By surprising your guests with instant, personalized photo galleries delivered straight to their phones, you guarantee an unforgettable, VIP experience that they will instantly share and talk about.

* Built for Chaos, Secured by Design

Live events are unpredictable. Our proprietary technology is engineered to perform flawlessly at scale, handling massive crowds while guaranteeing 100% data privacy for every single guest through secure verification.
